Fisher Funds KiwiSaver Plan Fund Update

Aggressive Fund

For the quarter ended: 30 September 2026
This fund update was first made publicly available on: 29 October 2026.

What is the purpose of this update?

This document tells you how the Aggressive Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Fisher Funds Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The fund aims to grow your investment over the long term by investing predominantly in growth assets.

Total value of the fund	$623,768,733
Number of investors in the fund	17,953
The date the fund started	26 March 2025

What are the risks of investing?

Risk indicator for the Aggressive Fund[1]:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

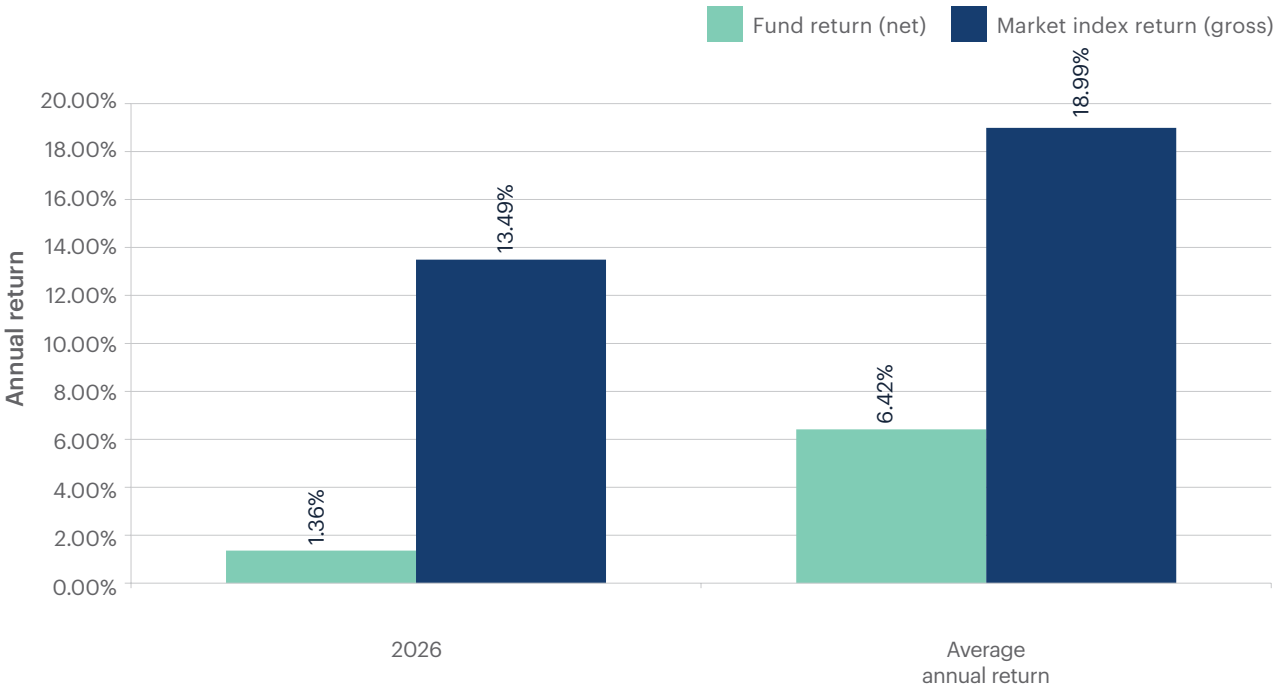

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	3.57%
Annual return (after deductions for charges but before tax)	4.78%
Market index annual return (reflects no deduction for charges and tax)	12.35%

The market index is a composite of S&P published and unpublished indices, weighted for the fund's target investment mix. The specific indices used for each asset class are set out in the Statement of Investment Policy and Objectives (SIPO). Additional information about the market index is available on the offer register at disclose-register.companiesoffice.govt.nz under Fisher Funds KiwiSaver Plan or OFR10715.

Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 September 2026.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower. The market index return reflects no deduction for charges and tax.

What fees are investors charged?

Investors in the Aggressive Fund are charged fund charges. Based on the PDS dated 30 September 2025, these are expected to be:

	% of net asset value
Total fund charges (estimate)[2]	1.16%
Which are made up of:	
Total management and administration charges (estimate)[2]	1.16%
Including:	
Manager's basic fee	1.06%
Other management and administration charges (estimate)[2]	0.10%

The Manager's basic fee is disclosed on a before tax basis. GST has been added to the other management and administration charges (estimate) where applicable.

In the year to 31 March 2027 we expect the total fund charges to be 1.23% as a result of an increase in Other management and administration charges. This is due to an increased exposure to private equity assets.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Alice had $10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Alice received a return after fund charges were deducted of $357 (that is 3.57% of her initial $10,000). This gives Alice a total return after tax of $357 for the year.

What does the fund invest in?

Actual investment mix

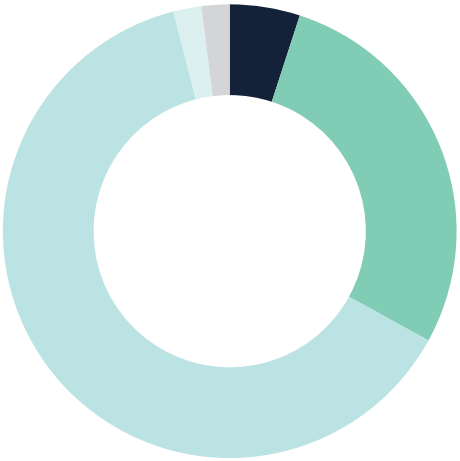

This shows the types of assets that the fund invests in.

Cash and cash equivalents	4.97%
Australasian equities	26.78%

Further information

You can also obtain this information, the PDS for the Fisher Funds KiwiSaver Plan, and some additional information from the offer register at disclose-register.companiesoffice.govt.nz under Fisher Funds KiwiSaver Plan or OFR10715.

Notes

1. Market index returns as well as the fund's actual returns have been used to fill in the risk indicator, as this fund has not been in operation for five years. Market index returns have been used from 1 October 2021 to 31 March 2025 and actual returns after that. As a result of those returns being used, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
2. An estimate has been used to calculate other management and administration charges based on a combination of forecast expenses expected to be charged to the fund and historic expenses charged to the underlying funds into which the fund invests.
