Fund Update

For the quarter ended 30 September 2026

- **InvestNow KiwiSaver Scheme**
- **InvestNow Foundation Series High Growth Fund**

This fund update was first made publicly available on: 29 October 2026

What is the purpose of this update?

This document tells you how the InvestNow Foundation Series High Growth Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. FundRock NZ Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

Objective: aims to provide returns that are broadly in line with the return of the underlying fund's investment benchmark before fees and tax over the long-term.

Strategy: provides exposure to a diversified fund that invests in a portfolio of predominantly growth assets but with a small amount of income asset exposure. The underlying fund incorporates certain responsible investment considerations and is exposed to investment strategies that seek to limit exposure to companies involved in specific business practices.

Total value of the fund	$12,788,214.80
Number of members in the fund	530
The date the fund started	16 July 2025

What are the risks of investing?

Risk indicator for the InvestNow Foundation Series High Growth Fund [i].

⇦ Potentially lower returns						Potentially higher returns ⇨
1	**2**	**3**	**4**	**5**	**6**	**7**
⇦ Lower risk						Higher risk ⇨

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at https://sorted.org.nz/.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 September 2026. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (**PDS**) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	11.19%
Annual return (after deductions for charges but before tax)	12.50%
Market index annual return (reflects no deduction for charges and tax)	13.47%

The market index return is calculated using the weighted average returns (before tax, fees and other expenses) of the Fund's various benchmark asset class indices. This has been the market index since the inception of the fund. Additional information about the market index is available on the offer register at https://disclose-register.companiesoffice.govt.nz .

What fees are investors charged?

Investors in the InvestNow Foundation Series High Growth Fund are charged fund charges which are:

	% of net asset value (including GST)
Total fund charges [ii]	0.37%
Which are made up of:	
Total manager and administration charges	0.37%
Including:	
Manager's basic fee	0.37%
Other management and administration charges	0.00%

The charges outlined above represent the fees charged within the underlying ETFs (external management fees) that the underlying fund invests into and have been estimated based on information in the underlying ETFs' disclosure documents. Note that the fees within the underlying ETFs are not tax deductible. Investors are charged each time they make a contribution to (buy transaction fee) or withdrawal from (sell transaction fee) the underlying fund. These fees are charged to cover the costs of the underlying brokerage, foreign currency exchange, transaction costs and investment management service fees associated with investing in the underlying investments. The underlying fund's current buy and sell transaction fees are 0.50%

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS for the InvestNow KiwiSaver Scheme FS Diversified Funds on the offer register at https://disclose-register.companiesoffice.govt.nz for more information about those fees.

Example of how this applies to an investor

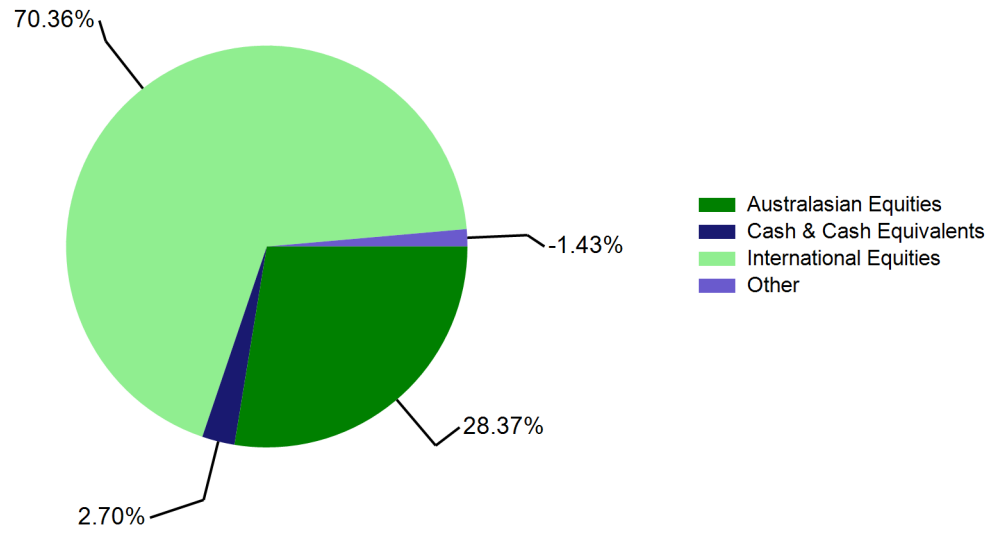

Small differences in fees and charges can have a big impact on your investment over the long term.

Anthony had $10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Anthony received a return after fund charges were deducted of $1,250 (that is 12.50% of his initial $10,000). This gives Anthony a total return after tax of $1,119 for the period.

What does the fund invest in?

This shows the types of assets that the fund invests in.

Further information

You can also obtain this information, the PDS for the InvestNow KiwiSaver Scheme FS Diversified Funds, and some additional information from the offer register at https://disclose-register.companiesoffice.govt.nz.

Notes

i. A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility. Market index returns have been used until July 2025 and fund returns thereafter.

ii. As the InvestNow Foundation Series High Growth Fund only started accepting contributions on 3 July 2025 historical fee information is not available. The fund charges represent our best estimates of the fees and expenses that will be charged to the fund. These have been estimated using information provided by the underlying fund manager and by reference to the underlying fund's disclosure documents.

iii. The top 10 assets add up to more than 100% of NAV as the fund also has liabilities which offsets these assets.
