What are the risks of investing?

Risk indicator for the Smart US 500 ETF

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 September 2026. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

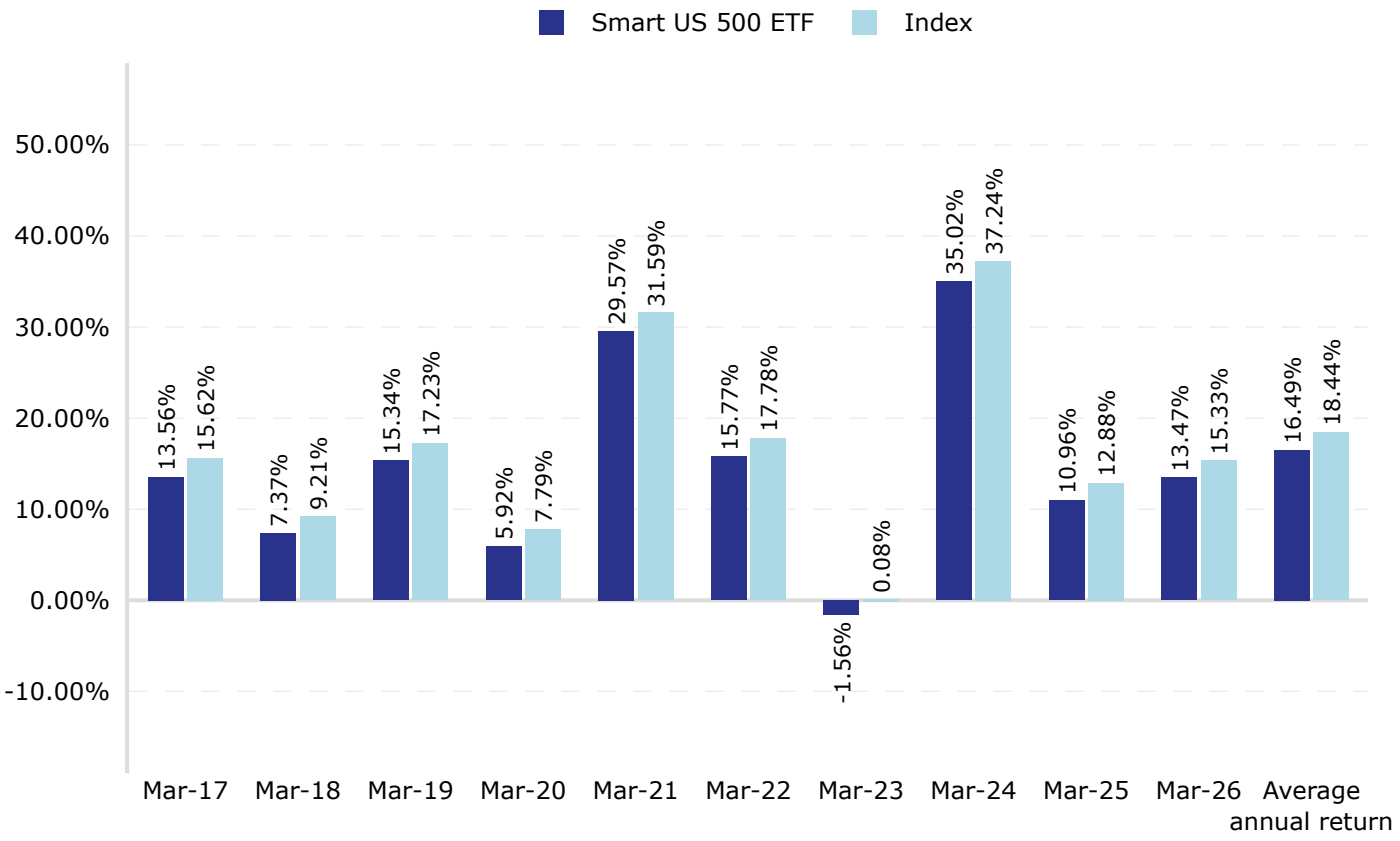

See the Product Disclosure Statement for the Smart Exchange Traded Funds – Core Series for more information about the risks associated with investing in this fund.

How has the fund performed?

	Average over past 5 years	Past year
Annual return (after deductions for charges and tax)	16.22%	17.60%
Annual return (after deductions for charges but before tax)	17.76%	19.16%
Market index annual return (reflects no deduction for charges and tax)	18.16%	19.57%

The market index annual return is based on the annual return of the S&P 500 Index. Additional information about the market index is available in the 'Other Material Information' document on the offer register at disclose-register.companiesoffice.govt.nz.

Annual return graph

This shows the return after fund charges and tax for each of the last 10 years ending 31 March. The last bar shows the average annual return for the last 10 years, up to 30 September 2026.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Smart US 500 ETF are charged fund charges. In the year to 31 March 2026 these were:

	% per annum of fund's net asset value
Total fund charges	0.34%
Which are made up of:	
Total management and administration charges	0.34%
Including:	
Manager's basic fee	0.33%
Other management and administration charges	0.01%[1]

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the Product Disclosure Statement for the Smart Exchange Traded Funds – Core Series for more information about those fees.

The fees set out above include GST where applicable.

Small differences in fees and charges can have a big impact on your investment over the long term.

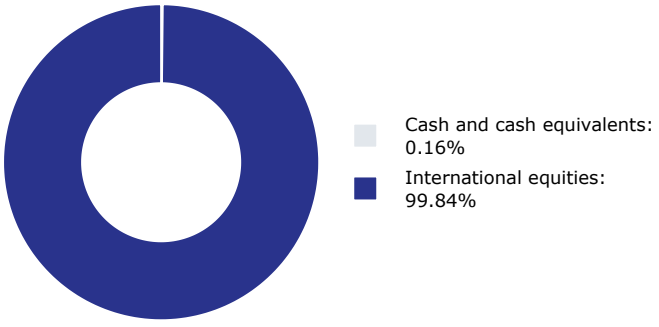

Example of how this applies to an investor

Tara had $10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Tara received a return after fund charges were deducted but before tax of $1,916 (that is 19.16% of Tara's initial $10,000). This gives Tara a total return after tax of $1,760 for the year.

Notes

1. We charge fixed fund charges that cover normal fund operating costs. For disclosure purposes, supervisor, audit and legal costs are not included in the manager's basic fee, but are included in the other management and administration charges. This may be shown as 0.00% due to rounding.
2. The top 10 investments listed in the table exclude current assets and current liabilities, and as a result do not sum to 100%.
