# 1. Description of the managed investment scheme

Amova Asset Management New Zealand Limited (“Amova NZ”, “we” or the “Manager”) is a wholly owned subsidiary of Amova Asset Management Co., Ltd (“Amova”), which is headquartered in Tokyo, Japan. Amova is a dedicated global asset manager with investment professionals across the world’s major financial centres. As one of the largest investment managers in New Zealand, Amova NZ provides investment management services for domestic assets through its Auckland- based investment team and has contracted offshore managers to manage global assets.

This Statement of Investment Policy and Objectives (“SIPO”) applies to the Amova NZ Investment Scheme (the “Scheme”), a registered managed investment scheme. More information on the Scheme and the current version of this SIPO are available on the scheme register and the offer register on Disclose (<https://disclose-register.companiesoffice.govt.nz/>).

## Roles and Responsibilities

Amova Asset Management New Zealand Limited is the Manager of the Scheme. Public Trust (the “Supervisor”) is the Supervisor of the Scheme. The roles and responsibilities of Amova NZ and the Supervisor are set out in the Trust Deed for the Scheme (dated 25 June 2021) between the Supervisor and Amova NZ which is available on the scheme register on Disclose (<https://disclose-register.companiesoffice.govt.nz/>).

Our Investment Committee is responsible for ensuring that the SIPO is adhered to.

## Funds

The Scheme offers a range of investment options which can be selected in any combination

Fund options include:

- Diversified Funds
- Other Funds

A diversified fund is an investment portfolio that combines a broad mix of asset classes to achieve specific risk-return objectives.

Other funds offer investment in a specific asset class, such as NZ shares or a specific sector within that class such as disruptive innovation.

As at the date of this SIPO the funds offered in the Scheme are:

Diversified Funds	Equity Funds
Amova Conservative Fund	Amova Core Equity Fund
Amova Balanced Fund	Amova SRI Equity Fund
Amova Growth Fund	Amova Concentrated Equity Fund
Amova Freedom Fund	Amova Global Equity Multi-Manager Unhedged Fund
<b>Cash and Fixed Interest Funds</b>	Amova Global Equity Multi-Manager Hedged Fund
Amova NZ Cash Fund	Amova Global Shares Fund
Amova NZ Bond Fund	Amova Global Shares Hedged Fund
Amova NZ Corporate Bond Fund	Amova ARK Disruptive Innovation Fund
Amova Global Bond Fund	

## 2. Investment objectives

Each fund has different investment objectives – see Appendix B for more information about each fund.

## 3. Investment philosophy

We believe that we can deliver strong and repeatable risk-adjusted returns for our investors because:

Markets are not always efficient, and indices are constrained therefore active investment management can discover and benefit from identified opportunities.

Investments are best managed by sector specialists within a comprehensive risk management framework. Where appropriate this may involve selecting and overseeing global investment specialists.

Asset allocation is a key driver of overall portfolio return. Diversification both within and across investment sectors helps to reduce risk and grow wealth over the long term.

Combining quality investment decision-making with patience and time will increase the probability of improving investor returns.

Environmental, social and governance considerations (ESG) are key to creating future value for our clients. See Appendix C for specific restrictions and how they are applied to our funds.

## 4. Investment policy and processes

### Governance

We operate within a strong governance framework and consider our fiduciary responsibilities of utmost importance. Amova provides global resources, delivering systems, policies and procedures, while the New Zealand business is overseen by an experienced Board, Investment Committee and Compliance, Risk & Disclosure Committee.

We have created a compliance programme to manage conflicts of interest and conduct which is continually updated to reflect the developing regulatory and compliance landscape.

In addition to our Compliance Programme, we have adopted, and fully endorse, the Amova “Code of Ethics and Business Standards” (the “Code”). All Amova NZ employees have signed acceptance of Amova’s ethics and business standards as outlined in the Code and are required to reaffirm this acceptance annually.

### Framework Overview

Senior Management supports a culture of compliance. Employees are trained and supported to adhere to all internal and external obligations. We employ locally a Head of Risk and Compliance and General Counsel to ensure the appropriate business controls and obligations are adhered to. Business functions are audited annually by the parent’s internal audit function, with KPMG providing external audit services. The Compliance Risk and Disclosure Committee consists of the Heads of Departments including General Counsel, Head of Risk and Compliance and the Managing Director and meets quarterly to review compliance and risk issues.

### Responsible Investment

Environment, social and governance (ESG) considerations are embedded into all our decision making. In addition, we have defined specific restrictions, which limit investments based on certain criteria or activities.

Refer section E - ESG, Responsible Investing and Specific Restrictions

Further information on restrictions, exclusions and how these are applied and monitored by both Amova NZ and our external and related party managers, refer to Appendix C.

## Trade Allocation and Trade Execution

In determining the execution and allocation of trades, we have a duty to act in the best interests of all investors. The following controls are in place to monitor the guiding principle.

### Execution

We have a fiduciary duty to prioritise the interests of investors over the interests of our own, our employees or any third party and to aim to achieve the “best possible result” for investors, consistent with any relevant constraints, such as investment strategy restrictions and applicable laws and regulations.

The best possible result is the most favourable overall result for the investor under the circumstances, giving regard to the following execution factors: price, costs, speed, likelihood of execution and settlement, size, nature or any other consideration relevant to the execution of an order.

### Allocation

When determining the allocation of trades, the Manager will act in the best interests of investors with no Fund receiving preferred trade allocation over another Fund. The method of allocating trades will be based on the following controls:

- A high level of transparency with all trades observable by investment teams, Operations and Compliance;
- Restrictions within the investment strategy for each fund.
- A maker-checker policy operates at a pre-trade level.

Our trade system includes modules for the monitoring of trade allocation and execution details.

## Hedging

Each Fund has different parameters regarding the ability to hold assets denominated in foreign currency. Any requirement or permission to hedge foreign currency exposure back to New Zealand Dollars has been defined within the investment strategy for each Fund.

Currency hedging contracts, if any, are held in the sector funds listed in the Strategic Asset Allocation. Currency is managed in accordance with the Amova NZ Currency Risk Management Policy. (available on request)

Our Currency Risk Management Policy sets out:

- How our hedging exposure strategy is established and implemented;
- The parameters that we adhere to; and
- Monitoring of compliance with the investment strategy of each Fund.

## Rebalancing

We have a Amova NZ Rebalancing Policy, which sets out how we undertake rebalancing. We have determined for each Fund in the investment strategy an appropriate strategic asset allocation and permitted investment ranges. Actual asset allocations will vary with market movements, market transactions and investor transactions.

The investment strategies for the Funds may consist of an asset allocation to other funds managed by us and cash pending investment or held for investor transactions. We review all cash balances daily to ensure they are within the investment strategy investment ranges.

We will rebalance as required to keep the Funds within the approved investment ranges. Transactions will be processed as soon as practicable subject to liquidity and market settlement conventions. To minimise the number of actual rebalancing transactions required by market movements, we use investor cash flows to maintain the asset allocation within the permitted investment ranges.

## Other

### Leverage and Borrowing

The Funds are permitted to maintain an overdraft with a registered bank in order to provide liquidity to fund redemptions and facilitate settlements. Other than the overdraft facility, no borrowing or leverage is permitted by the Funds except where expressly permitted.

For the underlying wholesale funds that utilise currency hedging, the value of the fund comprises the value of the underlying assets and any change in the value of the currency hedging contracts. Accordingly, this means that the exposure to the underlying assets will be less than or greater than the value of the respective fund. This is permitted and not considered leverage for the purposes of compliance with this SIPO.

### Derivatives

We seek to use derivatives to manage risk and to obtain exposures authorised by, and appropriate to, the overall investment objectives and strategy of each Wholesale Fund. The use of any instrument (physical and/or derivative) is undertaken in accordance with the objectives and constraints stipulated in the applicable governing documents.

### Investment Risk

Investment Risk is monitored independently by the Amova Risk Team in conjunction with the NZ office. The Group office has full oversight of trades and portfolio positions to assess investment risk. The Amova Global Market/Credit/Liquidity and Risk Management Policy sets out the management of these risks.

### Liquidity and Cash Flow Management

We have determined for each Fund an appropriate level of liquidity, including cash and exposure to liquid securities. This is defined within each Fund's investment strategy. We monitor the cash balances of the Funds daily and transact if necessary to ensure sufficient liquidity for investor transactions and any Fund expenses.

Further information on deferral and suspension of cash flow requests is contained in our Other Material Information which is available on Disclose (<https://disclose-register.companiesoffice.govt.nz/>).

### Limit breaks

#### Identification

SIPO limits are monitored at both pre-trade and end of day monitoring times for the Funds by separate rules-based checking software. Any potential limit breaks are reported on an exceptions basis in a follow up file for investigation by appropriately skilled personnel. Careful distinction is made to separate identified limit breaks occurring as a result of investment/divestment of investor cash flows versus those that are valid limit breaks caused by capital market changes or portfolio manager activity.

If the position requires amendment, the compliance function will proceed to remedy the position by raising the issue with the portfolio manager who will then trade to the mandated requirement. Authority to instruct remediation resides with the compliance function. The compliance function utilises a register detailing each proven notification raised by the rules-based checking software and the remedial action taken.

Judgement for materiality of the limit break resides with the compliance function who will generally consider: the cause of the limit break: either human error, system error or capital market event;

the economic impact on the investor, whether accretive or causing loss; and the frequency of the identified limit break type.

#### Limit break reporting

Under section 167(1) of the Financial Markets Conduct Act 2013, a "limit break" is "a material breach of any limits on" the SIPO. Limit breaks are reported to the Supervisor as follows:

- a. if a limit break is not corrected within 5 working days after we become aware of it, as soon as practicable after expiry of the 5 working day period; and
- b. all limit breaks (regardless of whether they have been corrected or not), each quarter.

## Pricing and Valuation

We have delegated certain administration functions to BNP Paribas Fund Services Australasia Pty Limited (“BNP Paribas” or “Administration Manager”) This delegation includes the calculation of daily unit pricing for the Funds and is governed by our Product Unit Pricing and Registry Policy. This policy describes how we manage our unit pricing and registry maintenance and recording obligations.

Prices of capital market securities to determine the net asset value of each Fund is provided by BNP Paribas through their data pricing providers. This ensures that pricing is undertaken by an independent third party. BNP Paribas maintain a Securities Pricing Policy which governs their approach to securities valuation.

A copy of our Product Unit Pricing and Registry Policy is available on request.

## Proxy Voting

Where capital market securities are held by the Funds or the Wholesale Funds that the Funds invest in, we may have the right to vote on shareholder resolutions. We exercise voting rights where available solely for the benefit of investors. Where we appoint an investment manager for a fund, we also outsource voting to that investment manager. We do not vote for the benefit of ourselves or third parties. The Amova Domestic Equities Proxy Voting Policy covers the requirements of the Amova NZ Equity team to consider and vote on resolutions. A copy of this policy is available on request.

## Conflict of Interest

We consider potential conflicts of interest and provide guidelines on how they will be addressed. Potential conflicts include personal holdings, trading by close relatives, the impact on trading activity of incentive-based conflicts such as performance fees, and extensive trading around performance reporting dates, such as portfolio pumping or window dressing. Another potential conflict is communicating with the media about specific securities or sectors. The commentary itself, as well as trading activity shortly beforehand or afterwards is monitored and assessed within the risk and compliance framework.

We have a comprehensive suite of operational and conflicts management policies.

## Personal Account Dealing

All staff are required to report their personal holdings and submit declarations annually in respect of any accounts. Personal trades, including those of close relatives, are monitored and pre-approved to ensure individuals are not benefitting from non-public information, or taking advantage of pending trade activity by the Manager. Personal trading without prior written approval from compliance is prohibited pursuant to the Amova Personal Trading Policy.

## Insider Trading

We have clearly established policies relating to both insider information and potential insider information. This includes global and local policies and procedures.

## Investment in related party assets

There are controls in place around investments made between our Funds (internal trades). We don't invest in private assets owned by other Amova entities.

## Incident Management

All incidents, that may include operational error, system or vendor failure are recorded and reported to management immediately. These are reviewed and escalated appropriately including regulatory disclosure if required. Incidents and errors are recorded internally through the Group Operational Risk Portal (ORP). Operational risk management and incident management policies are in place.

## Taxation

The Scheme is a Portfolio Investment Entity (“PIE”).

Our administration manager, BNP Paribas is responsible for attributing each Fund its income or loss, expenses, and tax credits (if any) per unit daily to each investor in the proportion of units they hold and the number of units in the Fund. Tax is paid directly to Inland Revenue annually after 31 March by our registrar, Apex Investment Administration (NZ) Limited. (“Apex” or “Registrar”) by redeeming units or on redemption of units and is based on taxable income attributed to each investor at their prescribed investor rate (“PIR”) which they must provide to us.

If the investor invests through a PIP or other custodial service or a wrap account (“Custodial Service”), the PIP or the Custodial Service will hold the investor's units in the Fund. Taxable income attributed to the PIP or the Custodial Service generally has tax deducted at 0% and the PIP or the Custodial Service is responsible for attributing tax to investors.

## 5. ESG, Responsible Investing and Specific Restrictions

Environmental, social and governance (ESG) considerations are embedded into all our decision making. In addition, we have defined specific restrictions, which limit investments based on certain criteria or activities.

A restriction does not necessarily mean a complete ban or exclusion. A summary of restrictions applied in each of the Amova NZ funds is included in this section. How restrictions are applied may differ between funds managed by Amova NZ, external managers, and related party managers. More information on this is included in Appendix C Responsible Investing – additional information. The table below shows which restrictions apply to each Fund in the Scheme.

	ESG restrictions applied by Amova	Primary Restriction		Exclusions	Other Restrictions		
		Tobacco	Fossil Fuels	Controversial Weapons	Gambling	Adult Entertainment	Alcohol
<b>Diversified Funds<sup>1</sup></b>							
Amova Conservative Fund	YES	●	◐	●	◐	◐	◐
Amova Balanced Fund	YES	●	◐	●	◐	◐	◐

Amova Global Bond	NO <sup>2</sup>	●	●	●	○	○	○

Restriction in place for 100% of Fund

Restrictions in place but not in all of the underlying funds

No specific restriction in place. ESG process is still applied where applicable.

1. Restrictions from the underlying funds these Funds invest in will apply.

2. These funds are not actively managed by Amova. The underlying managers use their own ESG framework for investment decisions.

For more information on restrictions, exclusions and how these are applied and monitored by both Amova NZ and our external and related party managers, refer to Appendix C.

## 6. Performance monitoring

Performance is monitored daily by us and measured independently by BNP Paribas monthly.

Each Fund's performance is summarised and tabled for discussion and comment at our Investment Committee meetings, held quarterly. Each measurement period (last three months, last year, last three years, last five years) includes the actual Fund performance, the agreed benchmark performance, and the excess return over benchmark, and volatility in the instance of the last five years measurement.

Investment performance objectives are set as an acceptable margin of absolute performance above recognised capital markets indices. Progress towards achieving investment performance objectives is generally measured over a rolling three-year period before fees, expenses and taxes.

## 7. Investment strategy review process

### Selection and review of external investment managers

All funds are assessed annually as part of Amova's ongoing Product Lifecycle Review process.

Portfolio Managers report to the Investment Committee on a quarterly basis.

Our dedicated Portfolio Manager, External Managers and Diversified Funds has responsibility for the delegation of investment management for a number of our Funds to specialist offshore managers. Appointment of an external manager will be noted in the investment strategy of each Fund.

Our search and selection process of external managers involves an evaluation with emphasis on the assessment of investment capabilities, research on parent/business, people, philosophy, process, and responsible investing.

Our Portfolio Manager, External Managers and Diversified Funds monitors each delegated manager's investment performance. This includes portfolio investment return and risk assessment relative to performance objectives and review of market commentary and portfolio activity. Monitoring results are reported to the Investment Committee.

A copy of our External Investment Managers Policy is available on request.

## 8. SIPO review process

This SIPO is reviewed in full at least annually. Review, currency and adoption of the SIPO are the responsibility of our Investment Committee, which is governed by our Investment Committee Charter (available on request).

When the SIPO is reviewed annually by the Investment Committee, the Investment Committee will take into account the investment strategy and objectives of each Fund and other matters including, but not limited to, relevant new standards or legislation and any material changes in market conditions. Significant changes may invoke an ad hoc review out of the annual cycle.

All amendments will be made in accordance with the Trust Deed and relevant law.

Compliance with the SIPO is monitored both pre and post trade on a continuous basis, by automated systems (Bloomberg AIM).

The Manager may amend or replace this SIPO only after having given reasonable prior written notice to and in consultation with the Supervisor.

The most current version of the SIPO is available on Disclose <https://disclose-register.companiesoffice.govt.nz> and on our website: <https://www.goalsgetter.co.nz/pds-and-other-information>

## Appendix A – Asset Class descriptions

We have broadly categorised each Fund by the Financial Markets Conduct Regulations (FMCR) Asset categories, using the category that most closely aligns with each underlying fund's assets. This categorisation is used in our other disclosure documents when describing asset allocations.

Asset Class – FMCR categories	Description
Cash and cash equivalents	Bank deposits including term deposits
NZ Fixed interest	Fixed interest assets issued in New Zealand
International fixed interest	Fixed interest assets issued outside of New Zealand
Australasian equities	Shares listed on a stock exchange in New Zealand or Australia (such as the NZX or ASX).
International equities	Shares listed on a stock exchange outside New Zealand and Australia.
Listed Property	Property shares listed on a stock exchange.
Other	Other investments that do not meet the criteria of the above categories, as determined by the Manager and agreed with the Supervisor.

# Appendix B - Investment strategies and objectives

## Diversified Funds

### Amova Growth Fund

The Fund will invest in an Underlying Fund, Amova NZ Wholesale Growth Fund, to provide exposure to the asset classes listed in the asset allocation table below.

#### Description of the Underlying Fund

A diversified portfolio of predominately growth assets to deliver growth in capital value over the long term.

#### Investment Objective

The objective of the Underlying Fund is to achieve a return which exceeds the weighted composite benchmark by 1.90% over a rolling three-year period before fees, expenses and taxes.

#### Target Asset Allocation – Underlying Fund

Asset Class	Target Allocation	Range	Underlying Fund*	Target	Benchmark
Australasian Equities	23.0%	13.0% -33.0%	Amova Wholesale Core Equity Fund	11.5%	S&P/NZX 50 Index Gross with Imputation Index
			Amova Wholesale Concentrated Equity Fund	11.5%	
Listed Property	7.0%	0.0% - 14.0%	Amova Wholesale Property Fund	7.0%	S&P/NZX All Real Estate (Sector) Gross with Imputation Index

<b>TOTAL GROWTH ASSETS</b>		<b>23.0%</b>

## Amova Freedom Fund

The Fund will invest in a selection of Amova Wholesale Funds, to provide exposure to the asset classes listed in the asset allocation table below.

### Description of the Fund

To provide an income stream for charitable purposes working in the area of human trafficking and modern slavery. Investors do not receive any financial returns but are able to access their capital when required.

### Investment Objective

The objective of the Fund is to construct a portfolio of Authorised Investments that generate a modest level of income without incurring material risk of capital losses which outperforms the RBNZ Official Cash Rate +0.5%.

### Target Asset Allocation

Asset Class	Target Allocation	Range	Underlying Fund	Target	Benchmark
New Zealand Fixed Interest	50.0%	45.0% - 55.0%	Amova Wholesale NZ Corporate Bond Fund	50.0%	Bloomberg NZBond Credit 0+ year Index
			Amova Wholesale NZ Bond Fund	0.0%	Bloomberg NZBond Composite 0+ year Index
Cash and cash equivalents	50.0%	45.0% -55.0%	Amova NZ Cash Fund	50.0%	Bloomberg NZBond Bank Bill Index

### Currency Management

Currency hedging contracts, if any, are held in the sector funds listed in the Strategic Asset Allocation. Currency management in accordance with the Amova NZ Currency Risk Management Policy.

# Sector Funds

## Amova NZ Cash Fund

The Fund will invest in an Underlying Fund, Amova Wholesale NZ Cash Fund, the to provide exposure to the asset classes described below.

### Description of the Underlying Fund

Aims to provide investors with regular income by constructing an actively managed investment portfolio of short- term deposits and bonds whilst preserving capital value.

### Investment Objective

The objective of the Underlying Fund is to outperform the Bloomberg NZBond Bank Bill Index by 0.20% p.a. over a rolling three-year period before fees, expenses and taxes.

### Target Asset Allocation – Underlying Fund

Asset Class	Appropriate Market Index	Target	Range
Cash and cash equivalents	Bloomberg NZBond Bank Bill Index	100%	95-100%
Cash on call for investor transactions		0%	0-5%

### Currency Management

All Investments will be in New Zealand dollars.

Cash on call for investor transactions		0	0-5%

### Currency Management

Foreign currency exposures created as a consequence of capital markets investment remain unhedged to NZD.

# Appendix C - Responsible Investing – additional information

Responsible investing is an important component of the decision making in all our funds. Amova believes that good portfolio management requires analysts and portfolio managers to understand the influence of these factors on price and business sustainability, and therefore investors.

## Definitions of Restrictions

These restrictions cover areas that are intended to be consistent across all portfolios over which Amova has control. This control is either due to the portfolios being managed by Amova or are mandates that can be amended unilaterally by Amova.

	Tobacco <sup>1,2</sup>	Fossil Fuels	Controversial weapons	Gambling	Adult Entertainment	Alcohol
	Companies with > 10% revenue from tobacco-related business activities	Companies with >10% revenue from the extraction of thermal coal and/or tar sands oil.	Companies directly involved in the development and production (manufacture), sale or distribution of cluster munitions, anti-personnel mines, and biological, chemical or nuclear weapons.	Companies with > 10% revenue from gambling-related business activities	Companies with > 10% revenue from adult entertainment related business activities	Companies with > 10% revenue from alcohol related business activities

Amova Wholesale SRI Equity Fund	✓	✓	✓	✓	✓	✓
Amova Wholesale Core Equity Fund	✓	✓	✓			
Amova Wholesale Concentrated Equity Fund	✓	✓	✓			
Amova Wholesale Property Fund	✓	✓	✓			
Amova Wholesale Global Shares - Unhedged and Hedged Funds	Investment prohibited in tobacco manufactures, defined as those included in GICS code 30203010	✓	✓	✓	✓	✓
Amova Wholesale Global Equity Multi-Manager Unhedged and Hedged Funds	Investment prohibited in tobacco manufactures, defined as those included in GICS code 30203010		Investment prohibited in any security that conducts activities listed on the Schedule to the Cluster Munitions Prohibition Act 2009.			
Amova Wholesale Global Bond Fund	The Manager is not permitted to purchase investments in tobacco manufactures. Tobacco manufactures will be identified based on information provided by third-party data vendors appointed by the Manager.	✓	The Manager is not permitted to purchase investments for the Portfolio of any entity listed by their appointed third-party research provider as being involved in 'controversial weapons'			
Amova Wholesale ARK Disruptive Innovation Fund						

<sup>1</sup>For domestic sectors, the universe of stocks and securities available for investment does not currently include any companies that fall within the tobacco sub-industry definition. Accordingly, Amova has determined that tobacco exposure will instead be measured by the level of income that can be directly attributed to tobacco products, and that any company with income from tobacco products exceeding 10% of gross revenues will be excluded.

<sup>2</sup>For global sectors, this exclusion is determined based on, whether a company is classified in the sub-industry "Tobacco". These industry classifications are determined by major global index providers and are internationally recognised, every company is assigned to a sub-industry by its principal business activity.

 This fund is not actively managed by Amova. The underlying Manager uses their own ESG framework, definitions, and processes for investment decisions.

## How restrictions are applied

For the domestic sectors which are managed internally by Amova NZ, restrictions are monitored directly by the portfolio managers and analysts. Publicly available data may be limited and, in some instances, companies are not required to disclose information. For domestic sectors, portfolio managers engage directly on a periodic bases to get additional information.

Restriction monitoring is then updated on an ongoing basis as new information becomes available.

Global Shares Funds is managed by a related party manager, Amova Global Equities Multi-Manager and the Global Bond Fund by an external manager. Restrictions, which may result in specific exclusions, are monitored using 3rd party vendors appointed by the managers of these funds. These vendors may change from time to time. Due to the timing and availability of data, it may not always be possible to identify in a timely fashion which company/companies should be included in this exclusion list, and that based on different sources of data, different vendors could provide different exclusion lists at any point in time. It is not considered a breach of mandate or this SIPO if the vendor engaged in monitoring this restriction reaches a different conclusion on any particular company to another vendor, and it is acknowledged that differences in research opinion will occur from time to time.

### **The restrictions and monitoring of activity does not apply to:**

- Securities issued by governments who may be involved in and/or have revenue sources from the industries described below. However, Amova NZ has internal controls reasonably designed to ensure compliance with applicable economic sanctions and trade embargo regulations. Amova NZ periodically confirms with its Delegated Managers their compliance arrangements to manage applicable sanctions obligations
- Second order factors refer to activities undertaken by companies which are not considered part of their primary business activity for example, if we held shares in a company that owns buildings and their tenants sell alcohol and tobacco products; or if we held shares in a freight company whose clients require them to transport restricted items, these would not be included in the assessment of restrictions of our funds

## Restriction Monitoring

Revenue thresholds will be reviewed periodically for relevant mandate compliance based on available information. The review will occur no less than annually. Where information cannot be obtained, the manager will determine the suitability of the investment in the context of the mandate guidelines. In addition, if we become aware of a company's position changing between assessments and the manager has exposure to that company, required sales will be made in a reasonable period of time (typically within 1 month).

Such exposure shall also not be considered a breach of this SIPO.

Amova will not be deemed in breach of any obligation in regard to these restrictions and shall incur no liability for losses resulting from the acts or omissions of any third-party monitoring vendor. Omissions include but are not limited to new issues or new issuers to which vendors would not yet have data mapped at a security level. The Manager will make reasonable efforts to map vendor data to new issues, but there may be instances in which vendors ultimately map their data in a manner that would result in a breach. Such an event will not be deemed a violation and the Manager will bring the portfolio into compliance similar to other instances that would be considered a passive breach. While gathering their data, vendors may assume certain value judgements (e.g., regarding the adequacy of a company's program for addressing a specific issue). The Manager does not verify those judgements, nor quantify their impact upon our analysis. These specific third-party monitoring vendors, categories, and/or thresholds may be amended or altered over time.
