Fund update

Responsible High Growth fund
Mercer KiwiSaver scheme

Quarter ending 30 September 2026

This fund update was first made publicly available on: 29 October 2026.

What is the purpose of this update?

This document tells you how the Responsible High Growth fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Mercer (N.Z.) Limited prepared this update in accordance with the Financial Markets Conduct Act 2013.

This information is not audited and may be updated.

Description of this fund

Invests almost entirely in growth assets such as shares and real assets, with only a small amount invested in defensive assets such as fixed interest and cash. May be suitable for investors wanting to invest predominantly in growth assets, who want higher long-term returns and are comfortable with high volatility in returns. This fund is managed with reference to environmental, social and governance (ESG) factors and is certified by the Responsible Investment Association of Australasia.

Total value of the fund	$478,253,419
Number of members in the fund	7,962
The date the fund started	1 October 2007

What are the risks of investing?

Risk indicator for the Responsible High Growth fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at **www.riskquiz.co.nz**.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

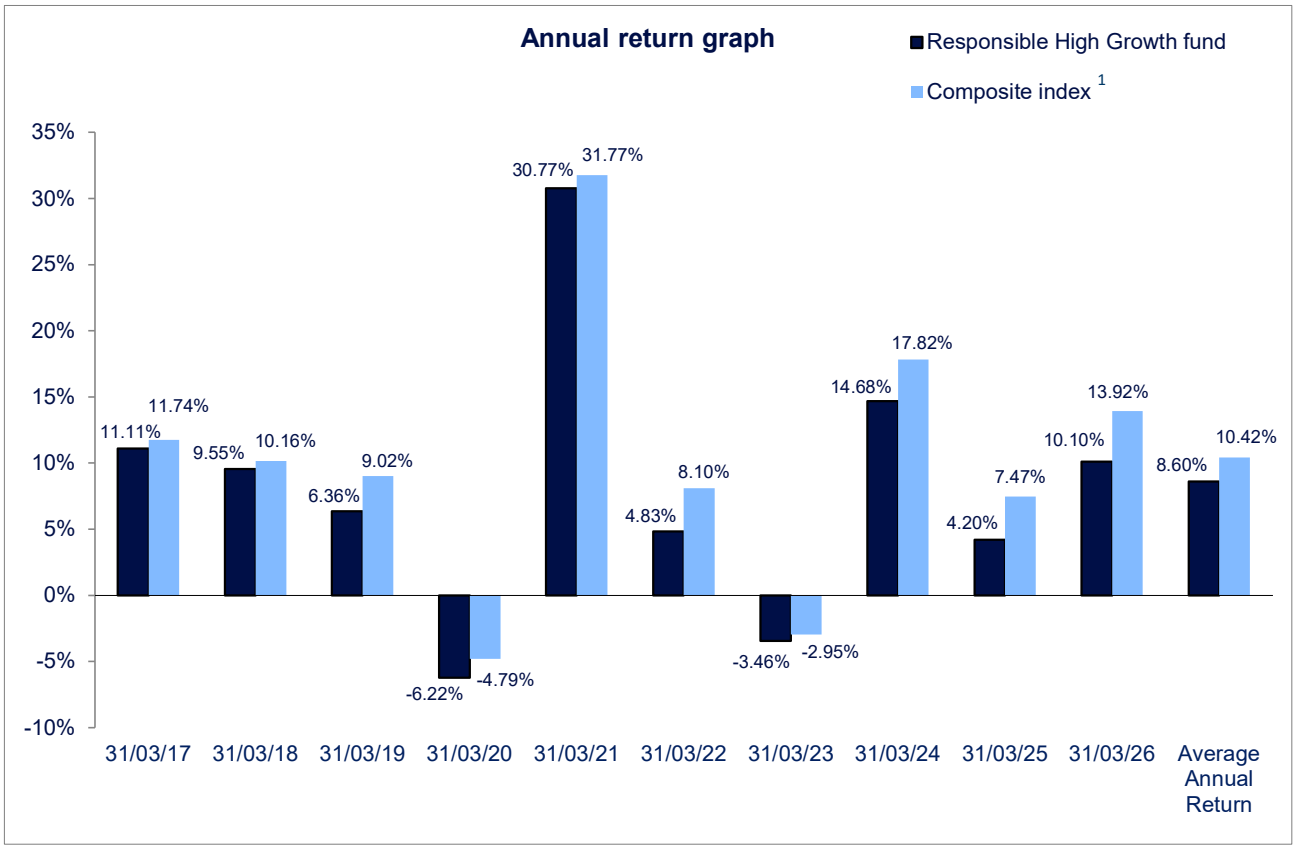

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 September 2026. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Average over past 5 years	Past year
Annual return *(after deductions for charges and tax)*	6.87%	10.42%
Annual return *(after deductions for charges but before tax)*	7.57%	11.53%
Composite of market index annual return *(reflects no deduction for charges and tax)* **and peer group indices annual return** (*after deduction for charges but before tax)* [1]	9.64%	12.36%

The composite index return is the strategic asset allocation weighted benchmark index return, where the benchmark indices are defined in the Statement of Investment Policy and Objectives. Additional information about the composite index is available on the offer register.

This shows the return after fund charges and tax for each of the last 10 years ending 31 March. The last bar shows the average annual return for the last 10 years, up to 30 September 2026.[2]

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Responsible High Growth fund are charged fund charges. In the year to 31 March 2026 these were:

	% of net asset value
Total fund charges [3]	0.88%
Which are made up of:	
Total management and administration charges	0.88%
Including:	
Manager's basic fee	0.81%
Other management and administration charges	0.07%
Total performance-based fees	0.00%

Investors are not currently charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the Mercer KiwiSaver scheme PDS for more information about Scheme fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

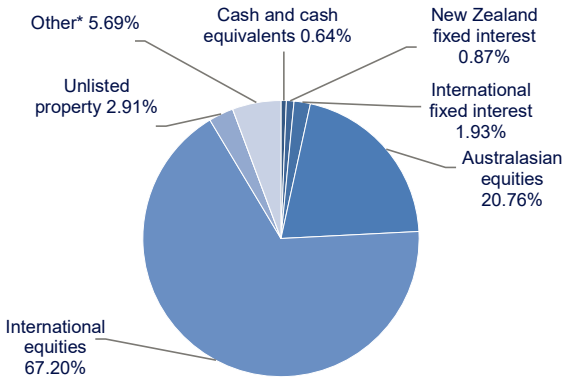

Example of how this applies to an investor

Ben had $10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Ben received a return after fund charges were deducted of $1,042.00 (that is 10.42% of his initial $10,000). Ben also paid $0.00 in other charges. This gives Ben a total return after tax of $1,042.00 for the year.

Currency hedging

Currency hedging can apply to some of the asset classes this fund invests in. The level of currency hedging for global shares is managed between 0% and 100% and may change over time depending on Mercer's view of the relative strength (or weakness) of the New Zealand dollar. Other global asset classes (Global Fixed Interest and Real Assets) target a 100% net of tax hedge to the New Zealand dollar. Refer to the Statement of Investment Policy and Objectives for more information which is available from www.disclose-register.companiesoffice.govt.nz.

Hedging coverage, on a net of tax basis, for the Fund's exposure to foreign currency as at 30 September 2026 was 56.18%.

Notes

1. The benchmark is a composite of market, peer group and absolute return indices. The absolute return indices were used up to 30 September 2018. From 30 September 2018 a composite has been used as there is no appropriate market index for the fund as a whole and market indices are not applicable for some of the asset classes in this fund. The composite index has been used in the table and bar graph in the *How has the fund performed?* section. The composite index may be a less reliable indicator of performance than a market index. The peer group indices returns reflected in the table and the bar graph are after deductions for charges but before tax. Additional detail regarding the peer group and market indices can be found on the offer register **www.disclose-register.companiesoffice.govt.nz.**

2. Returns for the year to 31 March 2024 are based on a unit price at 28 March 2024.

3. GST may be included in some expenses. GST will be included in fees where applicable.

4. For the reporting of the types of assets under Actual investment mix, cash retained for liquidity management at a sector level is assigned to the asset class to which it relates to.

5. The Top 10 investments have been calculated excluding cash retained for liquidity purposes.
